CABLE LAYING MACHINE AND ACCESSORIES

BURY WIRE UP TO 10 MM IN DIAMETER

***ONE MACHINE
TWO MOTORIZATION OPTIONS: GAS OR ELECTRIC***

***2022 EDITION
600mh.info***

600MH

one machine to bury wire
for various applications**

ISLAND CREATION

It is now easy to create islands around trees and obstacles such as flower beds, thanks to the Wire Twinning Device (PWMA-0017).

ROBOTIC LAWN MOWERS

Install wire from all robot manufacturers thanks to the wire spool support that will fit spools of all sizes.

IRRIGATION SYSTEM

Bury connecting wire to multiple sprinkler valves with ease.

PORTALS AND VIDEOPHONES

Install wire from the house to the equipment, even after the construction is finished.

OUTDOOR LIGHTING

Low voltage outdoor lighting systems have become increasingly popular; they require a great quantity of buried wire. Nothing's easier with the 600MH.

COMPATIBLE WIRE CHART [†]

| TYPES OF WIRE | VISUAL | WIRE GUIDES | | |
|---|---|-------------|------|-------|
| | | 4 mm* | 6 mm | 10 mm |
| Invisible fence wire for dogs |  | ✓ | ✓ | ✓ |
| Standard wire for robotic lawn mower |  | ✓ | ✓ | ✓ |
| Double-sheathed wire for robotic lawn mower |  | | ✓ | ✓ |
| Cat6 Ethernet wire |  | | | ✓ |
| Low voltage wire |  | | | ✓ |
| Irrigation valve wire |  | | | ✓ |
| Coaxial cable |  | | | ✓ |

* INCLUDED WITH THE MACHINE

DIGITAL OUTDOOR ANTENNA

Antennas and dishes are often positioned at a good distance from the house. They are now easy to connect.

INVISIBLE FENCES

Prevent pets from leaving the property by putting an electronic fence wire in the ground in minutes.

ETHERNET AND COAXIAL CABLE

High-speed internet access wiring is easy to install to reach isolated houses.

SURVEILLANCE CAMERAS

Numerous cameras watching a property is common now. Link them easily with the 600MH.

[†] The chart above shows different types and diameters of wire that can be buried with the 600MH.
Note that some optional accessories must be purchased separately for wires of 6 mm and wider.

600MH

Technical specs and advantages

VIDEO LINK

WIRE GUIDE

Up to Ø 4 mm (included)
Optimal shape
Sturdy
Up to Ø 6 mm (PWMA-0012)
Up to Ø 10 mm (PWMA-0019)

SLIDING FOOT

Provides easy control of the wire's depth
Prevents grass damage
Reduces debris on the blade and its axis

PERFORMANCE BLADE

For all soil types
Offset by 15 cm
Long-lasting

Note: The type of blade supplied with the machine may differ by region.

STEEL FRAME

Rigid and durable
Easy to clean
Powder coated finish

SELF-PROPELLED TRANSMISSION

Improves productivity
Decreases operator efforts
Control integrated in the handle

AG TIRES

Improved traction in wet
and slippery conditions
No dirt build-up in muddy
terrain conditions

YOU SHOULD KNOW

SEVERAL BRANDS AND MODELS OF BATTERIES AND CHARGERS ARE COMPATIBLE WITH THE 600MH-LI SUCH AS BRIGGS & STRATTON, GREENWORKS, CRAMER, STIGA.

REFER TO THE TABLE ON PAGE 10 FOR MORE DETAILS.

ANTI-VIBRATION HANDLE

Vibration levels reduced by 50%
Improves operator comfort
Ergonomic

TWO MOTORIZATION OPTIONS

Choose between:
The Honda GXH50 4-stroke engine you can count on (600MH model)
Or
1 kW brushless electric motor fueled by high-capacity 80/82V Li-Ion batteries (600MH-Li model)

WIRE REEL SUPPORT

Accommodates wire reels
up to Ø 300 mm x 200 mm L
Several possible configurations
Optional support available (PWMA-0014)
for oversized reels
(up to Ø 400 mm x 350 mm L)

PIVOTING JOINT

Pivots 30° to the right
Tilts 180° front to back
Facilitates installs in tight spaces

EDGE DISTANCE GUIDE

Can be installed on the front or the rear
Adjustable from 15 cm to 45 cm
Enables meeting all robot manufacturers' requirements

KICKSTAND

Retractable
Provides blade ground clearance on start-up

600MH

cable laying machine Designed by and for professionals

More versatile than ever

The cable-laying machine 600MH offers the ruggedness, durability and portability necessary to professionals. It was originally designed to optimize the work of robot mower installers. In constant evolution, the optional installation kit also allows the installation of wire up to 10 mm in diameter. It is then possible to use it also for burying wire for invisible fences, for outdoor lighting systems, for portal motorization, for videophones, for surveillance cameras, for high-speed Internet or cable TV connections, and more!

More profitable than ever

The ergonomic handle, featuring the anti-vibration system that significantly improves the operator's comfort, folds down to go from action, to transport, to storage. The 600MH has been designed to be carried around and operated by a single person and can bury up to 600 metres of wire per hour! Its performance blade, offset by 15 cm, will make its way through all types of soil, easily laying wire between 4 and 6 cm deep. Its low turning radius and its distance guide give access to every corner and provide a precise install, reducing the installation time. The optional wire twinning device allows to quickly go around islands and bury both wires in the same trench without having to do it manually. These are only a few characteristics that make this machine so productive - and hence very profitable!

One machine, two motorization options

Choose the 600MH with a Honda GXH50 4-stroke engine or the 600MH-Li powered by a Lithium-Ion 80/82 V battery and see how powerful it is.

Now the choice is yours!

600MH*

600MH-Li**

PERFORMANCE

Up to 600 metres of wire per hour

WIRE DEPTH

4 to 6 cm

WEIGHT AND DIMENSIONS

38 kg
56 x 46 x 125 cm

BLADE†

Efficient
For all types of soil

DIAMETER OF THE WIRE TO BURY

Up to Ø 4 mm
Optional: Up to Ø 10 mm

WIRE REEL SUPPORT

For reels up to Ø 300 mm x 200 mm L
Optional: for reels up to Ø 400 mm x 350 mm L

TWO MOTORIZATION OPTIONS

*GAS ENGINE

4-stroke Honda GXH50
Power: 1.6 kW - 2.1 hp

**ELECTRIC MOTOR

Brushless 80/82V Lithium-Ion battery electric motor
Power: 1.0 kW - 82V

† The type of blade supplied with the machine may differ by region.

ACCESSORIES

WIRE TWINNING DEVICE

PWMA-0017

When creating an island for the robot mower to avoid, the two wires between the island and the perimeter of the property must be twinned in order to cancel the signal and make the wires invisible to the robot. When there is a great distance between these two points, burying the wires by hand (on your knees) will cause a considerable time loss. Not anymore!

Thanks to the WIRE TWINNING DEVICE, you can bury both wires at the same time after going around the island with the machine. A diverting plate leads the wire laying on the surface towards a second wire guide installed behind the regular wire guide. An ingenious system then frees the surface wire once the perimeter is reached, which allows to continue to install without stopping.

This accessory available in option installs in no time on the 600MH and is compatible with all the machines built since 2016.

INSTALLATION KIT FOR WIRE UP TO 10 MM

PWMA-0019

Open up to new possibilities! This complete kit allows the installation of larger diameter wire, such as :

- Low voltage wire for outdoor lighting;
- Cat6 telecom cable;
- Coaxial cable;
- Control wire;
- and many others, up to 10 mm diameter.

The kit includes:

- Wire guide;
- Guide roller;
- Sliding foot with wider slot.

Like most of our 600MH accessories, it can be installed on all the machines built since 2016.

NOTE: If the wire reels exceed the standard size (Ø 300 mm x 200 mm L), we offer a Support for Oversized Reels (PWMA-0014), which accepts reels of up to 400 mm in diameter by 350 mm in width.

ACCESSORIES

SUPPORT FOR OVERSIZE REELS (UP TO 400 MM IN DIAMETER X 350 MM IN WIDTH)

PWMA-0014

You wish to use 1000 m reels for installing robot mowers?

You would like to install low voltage wire for outdoor lighting?

Oversized reels can be mounted on the 600MH with this support adjustable in width.

It includes a 450 mm threaded rod, hubs for 1000 m wire reels and a set of hubs for low voltage wire reels. The hubs and spacers provided with the 600MH can also be used in combination with these to accommodate different sizes of reels. A locking clamping knob is included and gives good control over the wire unwinding.

Material : Stainless steel, plastic

Weight : 2 kg

Reel dimensions : Up to 400 mm in diameter x 350 mm width

Maximum reel weight : 20 kg

TOOL POUCH

PWMA-0018

This tool pouch is meant to be firmly attached to the frame of the 600MH. Avoid time losses by keeping the necessary tools handy:

- Hammer, wire stripper, screwdriver, knife;
- Spare blade and hex key;
- Wire insertion tool;
- Stakes and wire connectors.

WIRE INSERTION HAND TOOL

PWMA-0020

Although the 600MH is doing most of the work, it sometimes happen that we need to push the wire down the trench manually. Here is an insertion tool that was especially designed for this purpose. The steel blade features a slot which guides the wire with no risk of damaging it. The vinyl handle offers a comfortable grip at an angle that allows to maintain downward pressure while sliding the tool in the trench.

A must-have and very affordable tool!

ANTI-VIBRATION HANDLE

PWMA-0015

Introduced on the 600MH in 2020, this system greatly improves the operator's comfort. Vibration measured at the operator level can be reduced by 50% in harsh terrain conditions.

Two dampers, moulded on heavy steel rods, are joined to the new 'C' handle and encased into an aluminum housing. A tubular shaft links the assembly to the existing pivoting joint, therefore preserving all the adjustment functionalities of the previous system.

As standard on 2022 machines. Fits all 600MH machines built since 2016.

HEAVY DUTY SOLID CARBIDE BLADE

PWMA-0008

This blade is made of a steel body on which a carbide moulded wearing plate is welded. An exclusive process combines brasing operations and tempering of the body of the blade in order to attain the rigidity required to resist impacts while the carbide will resist wear.

This is the ideal blade to use with the optional 6 mm wire guide (PWMA-0012) or with the installation kit for wire up to 10 mm (PWMA-0019).

Material : Steel and carbide

Weight : 0.151 kg

Dimensions : 20 mm x 125 mm x 5 mm

Note: The type of blade supplied with the machine may differ by region.

REVERSIBLE HARDENED STEEL BLADE

PWMA-0007

This 55-58 Rc hardened steel blade is the original blade. Thinner than the carbide blade, it can be used with the 4 mm wire guide. Reversible, it offers 2 types of teeth for great versatility.

Material : Hardened steel

Weight : 0.066 kg

Dimensions : 19 mm x 123 mm x 5 mm

Note: The type of blade supplied with the machine may differ by region.

600MH-Li BATTERIES AND CHARGERS

LITHIUM-ION BATTERIES AND CHARGERS (Sold separately)

Lithium-Ion batteries are considered as one of the greatest innovation in nearly 20 years!

Indeed, these batteries offer several benefits:

COMPATIBLE : With other battery-powered tools such as the Portable Winch PCW3000-Li, chainsaws, hedge trimmers, lawn mowers, leaf blowers, etc.

RECHARGEABLE : Can be recharged to full capacity at any moment of the discharge cycle without damaging the cells.

SIMPLES : Features a charge gauge that shows the remaining available working time before or during work.

PROFESSIONAL PERFORMANCE : With their extremely high efficiency, these batteries provide ample power to run powerful tools for a long time. Moreover, they have a very low self-discharge rate when not being used, only 1.25% per month.

EMISSION-FREE OPERATION : Electric motors produce no exhaust gas or emission. In addition, using rechargeable batteries means a sustainable use of resources.

As you can see, several brands and models of batteries and chargers are compatible with our cable laying machine. Some brands or models are available in some countries while others are not. We invite you to check with your retailer to find out which ones are available in your area.

| B A T T E R I E S | BRAND | MODEL | VOLTAGE | RATED CAPACITY | CHARGING TIME (100%) | WEIGHT (KG) |
